b. In pairs: Say which kinds of pollution affect tourism and cause diseases.

air pollution

land pollution

I think land pollution badly affects tourism.

Reading

a. Read the essay about some effects of pollution and choose the best introduction sentence.

1. Air, water, light, and noise are the four main types of pollution affecting our world.
2. There are many types of pollution, and each type can affect people, wildlife, and the environment.

_____. This essay will discuss the effects of different kinds of pollution.

Air pollution causes health **issues** such as **coughing**, breathing problems, and **heart** and **lung** diseases. Nearly seven million people die every year because of air pollution*. It also affects animals. If we keep polluting the air, more humans and wildlife will die.

Water pollution affects fish the most. In the USA, about 40% of the rivers and lakes are very polluted. Fish can't live in those rivers and lakes**. Unless people stop polluting the water, there won't be any fish left in our rivers.

Land pollution affects trees, wildlife, and people. Trees and plants cannot grow well in polluted **soil**, so animals lose their homes and cannot find food. Fruit and vegetables can **even** be dangerous to eat if they grow on polluted land. If people eat this **poisoned** food, they will get sick.

In conclusion, we need to reduce pollution because it is damaging the environment, causing health problems, and affecting wildlife.

*Air pollution, World Health Organization

**Water pollution, ECAVO

b. Now, read and write **True**, **False**, or **Doesn't say**.

According to the essay,

1. pollution is the biggest problem facing the world today.

Grammar Meaning and Use

First Conditional with "if" or "unless"

We use **First Conditional** to talk about future situations we think are real or will happen and their results.

A: What **will** happen **if** people keep burning trash?

B: **If** people keep burning trash, the air **will** be polluted.

We can use **unless** to say what will happen if we don't do something.

Unless we stop burning trash, the air will be polluted.

The air will be polluted **unless** we stop burning trash.

a. Read about First Conditional with "if" or "unless", then fill in the blanks.

b. Listen and check your answers.

Listen again and repeat.

What _____ if we
_____ throwing
trash into rivers?

Unless we _____
throwing trash into rivers, lots of
fish _____ die.

Grammar Form and Practice

First Conditional with "if" or "unless"

- First conditional sentences have two clauses. We use the **Present Simple** tense in the **if** clause and **will + bare infinitive** in the main clause.
- The **if** clause often comes first, but it can come after the main clause. We don't use a comma (,) before **if**.

If there's too much trash on beaches, people **won't go** there.

There **won't be** any fish left **if** we **keep** polluting the sea.

A: What **will happen** **if** we **keep** polluting the air?

B: **If** we **keep** polluting the air, there **will be** more diseases.

- We can make negative conditionals using **unless** instead of **if**.

Unless we stop polluting the air, there will be more disease.

Note: "keep" changes to "stop".

a. Read the notes and examples above, then fill in the blanks with the correct form of the verbs in brackets to make First Conditional sentences.

- If we don't stop (not stop) polluting the air, we will damage (damage) the environment.
- What _____ (happen) if we _____ (not do) anything to lower pollution?
- It _____ (not affect) the wildlife if we _____ (keep) the rivers and seas clean.
- There _____ (be) fewer birds if we _____ (not stop) damaging their homes.
- If there _____ (be) too much trash on beaches, fewer people _____ (want) to visit them.
- We _____ (not be able) to stop land pollution if we _____ (keep) using too much plastic.

b. Look at a student's notes and write First Conditional sentences using "if" or "unless" clauses.

Notes:

- we keep polluting land → soil not safe to grow food in
- animals lose homes ← people protect forests (unless)
- we leave plastic bags and bottles on beaches → badly affect tourism
- we breathe polluted air → not get sick (unless)
- more people use public transportation → less air pollution
- more diseases ← people stop polluting the environment (unless)

- If we keep polluting the land, the soil won't be safe to grow food in.
- _____
- _____
- _____
- _____
- _____

c. In pairs: Make First Conditional sentences using the prompts and "if" or "unless".

Conditional clause	Main clause

Subject: New phone!

Hi, Sofia,

How are you? I hope the weather's great in Barton!

Guess what! I talked to Jack at school today. He knows a lot about phones and computers, and he helped me choose which smartphone I want for my birthday!

I want to get a smartphone for playing games. I'm going to ask my dad for the Nebula Z. I'm really excited! It looks great, but the screen isn't as good as some other phones. However, it has lots of storage, so I can store lots of games, and it also has really long battery life. I think it lasts for around two days! The best part is that it's not too expensive, so I'm sure my dad will agree to buy it for me.

I can't wait to show it to you!

I really hope you can come to my birthday party next Saturday. It's going to be fun!

See you soon,

Kate

A New Home in the Future

by James Stone

Our planet, Earth, is becoming more and more **crowded**. The world's **population** will reach 11 billion by 2100*. I think we will need to find a new home in the future. The options are really exciting!

One option is to live on another planet, like Mars or Venus. It's important that the planet has **similar** gravity to Earth. We need gravity to stay healthy and on the ground! Venus's gravity is similar to Earth's, but Mars's is much lower. Temperature will also be a problem. Mars is very cold, and Venus is very hot. People will need to stay inside all the time. Mars and Venus also don't have enough oxygen for humans.

Another option is to live in space stations. We can build these near Earth, so people won't have to travel far. However, they're small. There won't be room for people to move around. Also, there's no gravity on a space station. Living there for a long time will affect people's health.

We don't know where our next home will be yet. There's no other place like Earth. Our **new** home will be strange, but very exciting!

*according to UN Department of Economic and Social Affairs, 2017

b. Now, read and answer.

According to the writer,

1. What will the world's population be by the year 2100?

11 billion

2. How is Mars's gravity different from Earth's?

3. Why will people need to stay inside on Venus?

4. Why is it good that we can build space stations near Earth?

5. The word **new** in paragraph 4 is closest in meaning to _____.

A. different from before

B. recently made

C. not known before

c. Listen and read.

d. In pairs: Would you prefer to live on Mars, Venus, or a space station? Why?

I'd prefer to live on Venus because its gravity is similar to Earth's.

Grammar Meaning and Use

Future Simple (will)

We can use **will** to predict what we think will happen based on our own opinions and experiences.

A: What **will** people **do** when there are too many people on Earth?

B: I think people **will live** on another planet.

a. Read about Future Simple and fill in the blanks.

ANDY'S SPACE BLOG

The Night I Saw a UFO

by Andy Wilder

I'll never forget the time I saw a UFO.

I was ten years old. I was in the park with my older brother. It was summertime, but the park was very quiet. We played soccer until it got dark.

We were getting ready to go home when we saw a strange light in the sky. It was moving quickly and making a loud noise. We ran home and hid under my brother's bed. We were really scared! The UFO **hovered** above our house for a few minutes, and then it flew away.

My brother thinks it was an airplane, not a UFO. I think he's wrong because airplanes can't hover like that! I really believe it was a flying saucer from another planet.

b. Now, read and circle **True**, **False**, or **Doesn't say**.

1. Andy and his brother played soccer before they saw the UFO.
2. Andy and his brother were the only people in the park.
3. The UFO was moving quickly.
4. They hid under Andy's bed.
5. Andy thinks the UFO came from Venus.

Writing Skill

Writing a narrative passage

To write a good narrative passage to tell a story, you should:

1. Start by saying the main thing that your story is about.
I'll never forget the day I met an alien at school.
2. Introduce the situation and main characters.
I was eleven years old. I was at the school library with my best friend, Alex.
3. Write the events of the story in the order that they happened. Add details about what you saw, heard, and felt.
We were doing our homework when we saw a very strange woman walk into the library. She had green skin and red lips. She made strange sounds when she talked. We were so scared. We screamed and ran out of the library.
4. End the story by giving your feelings or opinions about what happened in the story.
I think she was an alien from Mars.

b. Reorder the narrative passage below. Use the Writing skill box to help you.

- ☐ We were walking to the train station when I saw a strange object. It made a loud noise. It was white and blue, and it was really big.
- ☐ I thought it was a flying saucer. I was really excited, so I took some photos of it.
- ☒ 1 I'll never forget the day I saw a flying saucer in the middle of London.
- ☐ I think seeing the flying saucer was my favorite part of the trip!

5. What does the writer say that parents should give their children?

The Teen Stress Problem - by Alex Cooper

These days, many teenagers feel stressed.

At school, they have a lot of things to study, and they often have tests. Many students **attend** extra classes after school, too. When they get home, they have lots of homework to do. When they finish their homework, they have to help their parents with chores. This means that many young people don't have much time to relax, so they find it difficult to sleep or focus on their school work.

I have some ideas about how to help teenagers with this problem. I think that schools should have yoga classes because yoga can help to reduce stress. I also think that parents should give their children some time to relax after school.

I really believe that if more young people do yoga and relax, they will be less stressed.

c. Listen and read. 

d. In pairs: Do you think the writer's ideas are good? Why (not)?

I think doing yoga is a good idea because it is good for our mind and body.

Writing

Writing Skill

Writing problem and solution passages

To write a problem and solution passage, you should:

1. Introduce the problem.
These days, many teenagers are unhealthy.
2. Explain the problem in detail. You can talk about its causes and/or effects.
*There aren't many places in our city to do exercise or play sports. This means that many young people do not exercise, so they don't become **fit** and strong.*
3. Give solutions and explain why they work.
I have an idea about how to solve this problem. Our city needs more sports centers for teenagers. This will help teenagers to exercise more often.
4. Summarize your main points and say how your solutions will solve the problem.
I believe that if there are more places for teenagers to exercise, they will be much more fit and healthy.

b. Read the sentences and write **P** for problem or **S** for solution.

- ☒ **P** A lot of young people in my town lose their smartphones.
- ☐ Another school bus will help to solve this problem.
- ☐ I have an idea about how to solve this problem. Teenagers should get jobs during the summer holidays.
- ☐ One way to solve this problem is keeping the phone in a pocket or bag when we go outside.
- ☐ Many teenagers feel bored during the summer holidays.

Subject: The phone I want

Dear Sam,

How are you doing?

I spoke to my brother last night, and he told me a lot about smartphones. Now I know which one I want to get.

I want to watch movies, listen to music, and play games, so I'm asking my dad to buy me the Model SS. It doesn't look very cool, but the screen is really big, and the battery life is really long. It lasts for over 30 hours. It has a lot of storage, too.

However, it is quite expensive. It's 549 dollars, so I'm not sure he will buy it for me.

I can't wait to see you next month for your birthday party.

See you then,

Kenny

B: Hello, my name's Harry Wilson. Welcome to my presentation. I'm here to talk about the effects of pollution and how our school can help.

Our town has lots of environmental issues. The biggest one is water pollution. If we keep polluting the water, it will make our drinking water dirty. Air pollution is also a problem. If we keep polluting the air, plants and trees will die. Land pollution is another problem. Animals will lose their homes if we don't stop polluting the land.

Our school can help with these issues. I think we shouldn't waste water at school, so that we can reduce water pollution. I think we should plant some trees in the playground and ride our bikes to school. This will reduce air pollution. Finally, I think we should reuse our plastic bottles, so we throw away less plastic.

If we don't do something soon, pollution will get worse.

Thank you for listening. Do you have any questions?

Annie: Hi, everyone. My name's Annie, and these are my friends, Vy and Andy. Today, we'll talk to you about our new robot, the *RescueBot*. If you want to keep yourselves safe during a disaster, this presentation will be very interesting for you. Our presentation is in three parts. First of all, Vy will talk about the issues humans face during disasters. Next, Andy will explain how the *RescueBot* can help. Finally, I'll tell you about the *RescueBot*'s special skills. Over to you, Vy!

Vy: Thanks, Annie! Every year, people around the world have problems during disasters. It can be difficult for rescue workers to find people because they (...)so even when they try their best, sometimes rescue workers cannot save people. Now, Andy will explain how the *RescueBot* can help rescue workers.

Andy: Thanks, Vy! The *RescueBot* can navigate through dangerous situations more quickly and carefully than any human. It can carry two people at a time. Next, Annie will tell you about *RescueBot*'s special skills.
