Preface

Tiếng Anh 10 Bright is a textbook based on the latest English curriculum of the Ministry of Education and Training. The book is specially designed to enable students to develop the skills they need to face the challenges of the 21st century.

Tiếng Anh 10 Bright consists of eight units. Each unit contains *Vocabulary*, *Grammar*, *Reading*, *Listening*, *Speaking*, and *Writing* sections, along with *Culture Spot* and *Values* sections. All *Reading* texts are accompanied by theme-related videos. *Grammar* features language presented in context with engaging practice activities. In addition, *Think!* exercises aim to develop students' critical thinking skills. *Study Skills* sections help students become autonomous learners while *ICT* tasks aim to develop students' information and communication technology skills. There are also a variety of tasks that promote collaboration and creativity. For every two units, there are *Culture Corner*, *CLIL*, and *Progress Check* sections. For every four units, there is a *Review* section.

We wish to thank the Board of Review from the Ministry of Education and Training for reviewing *Tiếng Anh 10 Bright* and providing valuable insights into how to bring the book to perfection.

A MAGIC helping hand

No one likes doing chores. They're boring, messy, and you don't often have the time to do them in your busy lives. However, now there's a way to spend your weekends enjoying yourself, and make the most of your free time, instead of cleaning! Give your boring chores to a house robot!

Lots of shops are selling home robots at the moment. From robot vacuum cleaners to robot mops and even robots that clean your windows! However, all of these robots are very basic and can only do one job. But is there a robot that does lots of different household chores, just as well as a human? Believe it or not, the answer is yes!

Meet the SpotMini Robot from Boston Dynamics! SpotMini is just like a robot butler. It can load the dishwasher for you, set and clear the table, bring you drinks, carry your groceries and even sort recycling. SpotMini has four legs just like a robot dog, and a long arm which it uses to do its chores. This gentle robot can move around a room, avoid your furniture and even walk up and down stairs. This means SpotMini can take your laundry from your bedroom upstairs to your washing machine downstairs. So, for a life of luxury, invite SpotMini into your home. You won't regret it!

CULTURE SPOT

Family is an integral part of Vietnamese life and it may be common for three generations – grandparents, parents, uncles, aunts, and children – to live in the one home.

Weekdays start early. Parents go to work, children go to school and the elderly members look after small children.

Respect is very important in the family. Children show respect to their parents and grandparents.

Do you think it is the same in other countries?

Thăng Long Water Puppet Theatre

New message

Hi Michelle,

I had an incredible experience in Hanoi today! Cory and I went to see a traditional water puppet show at the Thăng Long Water Puppet Theatre. We were excited because these performances are an important part of Vietnam's cultural heritage.

When the performance started, I was completely surprised to see a colourful dragon moving across water. 1

While a band was playing traditional music, the puppets were moving and dancing on the surface of the water. The puppeteers hid behind a bamboo screen and used underwater rods to move the wooden puppets. The singers in the band were encouraging the characters in the stories with their songs. I couldn't understand what they were saying in Vietnamese. 2 At one point, a dragon sprayed water at the audience!

The stories in the show are about farm life as well as folk tales and legends. 3 Back then, villagers performed water puppet shows to celebrate the rice harvest and other special occasions. They made characters from wood and used rods to make them move on the water, just like the puppeteers do today.

I am so happy we had the chance to see this unique performance that goes back thousands of years!

See you soon.

They live mainly by growing rice and raising poultry and cattle. They have their own language and traditions and are known as friendly and welcoming people.

In modern life, many of the Mường people still make their clothes themselves. They need to be very creative, talented and patient because their clothes have colourful patterns on them, which are difficult to make and take a lot of skill and time. Mường women often wear a long black skirt, a white shirt and a plain or colourful headscarf. Men often wear a long white shirt with dark trousers.

The Mường people have their own style of music and they play the *gong*, one of the traditional musical instruments of the Mường culture. Native Americans

Thousands of years before the Europeans came to America, the people now called Native Americans lived there.

A

The Native Americans lived in tents called tepees, which they made from animal skins and tree branches. They hunted animals for food, such as deer and buffalo, and were also excellent farmers. They even grew different plants to make medicine. They also made beautiful pottery and jewellery.

B

The Native Americans enjoyed music. They played drums and wooden flutes. Dancing was important to their culture, too. When the weather was too hot and dry, they would come together for a 'rain dance', which they believed made the rain fall.

C

Native Americans did not travel on horseback until the 1600s, when Europeans brought over horses on ships. Before this, Native Americans did not travel. They sent messages to each other from far away by using smoke signals. They used this system to communicate with people up to 50 miles away!

Today, there are only around five million Native Americans living in the United States. Although they have a more modern lifestyle, they still try to keep their traditions alive.

UNICEF is short for the United Nations International Children's Emergency Fund and its purpose is to provide support to children around the world. The organisation works in over 190 countries. In the beginning, this charity worked to improve the lives of poor children after World War II. Today, UNICEF works to make sure children everywhere have basic rights, such as food, shelter, healthcare and education. The organisation also provides emergency support by helping people in disaster areas. UNICEF receives support from governments and private givers.

Many famous people have helped out by becoming celebrity ambassadors to UNICEF. They use their talent and fame to educate the public on the problems faced by children worldwide. Recently, the charity has provided clean water to millions of people. It has also given millions of children access to education and helped them get enough to eat. Mark _____ Stacey _____ Helen _____

A woman's work is never done!

In the past, there were a number of jobs that were traditionally thought of as 'man's work', but not anymore. Meet two women breaking those traditional barriers.

Caroline works as a type of camera assistant called a grip. She holds and moves the camera on a film or television set. She really enjoys her job but says it is hard work. "There's a lot of heavy lifting that can be difficult." She thinks the physical side of the job is why there aren't a lot of women in this job. She found it especially difficult when she started. People thought she worked in makeup or the art department and would tell her to stay away from her camera. Now, however, they accept who she is and what she does.

Emma is a mechanic. She has always loved cars and started working unpaid in a garage when she was 27. She soon knew enough to train for a qualification. Emma thinks that women are better mechanics than men because they are calmer and more easily able to focus on problems. She has also found that a number of drivers, especially women, prefer to speak to her about their cars because they trust her more. That's the reason she decided to open her own garage. She plans to open more garages, so she can train more women to be mechanics.

The Association in Support of Vietnamese Handicapped and Orphans (ASVHO) is an organisation that works to make the lives of orphans (children without parents) and disabled people in

Vietnam better. Started in 1992, ASVHO helps these people with medical treatments, transport and places to live. Over the years, ASVHO has raised money and provided support to these people. This support includes providing important surgery and buying wheelchairs for disabled people. The organisation also donates bicycles to orphans and gives financial support for their education. One of ASVHO's goals is to help these people live as independently as possible. It achieves this by creating housing communities and offering training that can lead to job opportunities.

One popular event is a singing competition where disabled people from all over Vietnam compete, and the best performers receive medals. Another successful event is the Vietnam Disabled People's Day which improves understanding across the country of the problems disabled people face. 1 When did women in Britain gain the right to vote?

2.17 Listen and read to find out.

Votes for Women

When we think of women who have led the way, we often think of people such as Marie Curie, the first woman to win the Nobel Prize, or Amelia Earhart, the first woman to fly alone across the Atlantic Ocean. But there are also times in history when women have worked together to

improve the lives of other women.

This happened in the Victorian era, when women in Britain started to fight for their right to vote. Before 1918, women were not allowed to vote. From around the 1860s, groups of women started to come together to organise activities and talk about helping women to get the right to vote. In 1903, Emmeline Pankhurst set up the Women's Social and Political Union, or WSPU. The WSPU made speeches, wrote in newspapers, and demonstrated on the streets smashing windows and

setting buildings on fire. However, during World War I, the WSPU stopped their attacks and supported the government. As men were away fighting in the war, women took on many jobs that men used to do, like police officers and bus drivers. In these jobs, women showed everyone they were equal to men.

In 1918, the government finally gave women over 30 the right to vote for the first time. It was an important step in the fight for equality for women in society. However, it wasn't until ten years later, in 1928, that all women over 21 could vote as men could.

Girls Auto Clinic

Patrice Banks was from a poor family, but she was very intelligent. She studied science at university and became a chemical engineer at a big company in Philadelphia, USA. She earned a good salary and wore smart clothes and high heels in the office. At work, she was respected, but there was one thing she really hated – taking her car to the mechanic! She didn't understand how her car worked and she felt that the young, male mechanics were behaving to her as if she was stupid. She tried searching for a female mechanic instead ... but she couldn't find a single one.

That's why, in her thirties, Patrice learnt to be a mechanic at a night school. Then, she quit her job and worked in a repair shop before opening her own – Girls Auto Clinic. Here, Patrice wears high heels, but she's still serious about her job. Her shop has an all-female staff and an on-site beauty salon, so customers can fix their hair and nails while Patrice and her team are fixing their cars! Patrice also runs workshops for women to help them understand how their cars work and how to fix them.

- 2 Patrice always knew a lot about cars. _____

Glastonbury Festival

The UK has some fantastic music festivals, but which one is the favourite of British fans? It's definitely Glastonbury! It takes place at the end of June every year, in Pilton, Somerset, England.

The first festival happened in 1970. It lasted two days and tickets cost just £1 each – plus every festival-goer got free milk from the farm! Only 1,500 people came that year, but it was the start of something very special. These days, a ticket to stay the whole five days costs over £200. The price doesn't put people off, however – around 200,000 people attend every year, and tickets sell out in about 30 minutes!

The great music is only part of the Glastonbury experience. Festival-goers camp in tents around the farm and stay up all night dancing. Of course, they have to be prepared for the British weather. It often rains, and there is a lot of mud, so a pair of wellies* is essential! But at Glastonbury, people don't mind the bad weather. They love nature and care about the environment. In fact, Glastonbury has been a plastic-free festival since 2019, when the organisers decided to stop selling food and drinks in plastic containers. It's hard to say what makes Glastonbury a better music festival than all the others. Is it the bands, or perhaps the location? British singer Elly Jackson (La Roux) thinks it's the atmosphere. "Festivals all have one," she says, "but Glastonbury has something other festivals will never have."

2.23 Listen and read to find out.

CLEANING UP THE OCEAN

Plastic pollution in our oceans is a major issue that has serious effects on marine ecosystems and wildlife. These days, more and more people are considering reducing the amount of plastic they use, but what about the rubbish that is already in the oceans? In some parts of the world, it forms floating islands of plastic. The largest of these is the Great Pacific Garbage Patch between North America and Japan. It's three times the size of France!

Now, however, one amazing teenager called Boyan Slat has invented a machine, System 001/B, which catches ocean rubbish. It is a huge 600-metre floating barrier of pipes. A net hangs down from the pipes and reaches three metres below the surface of the water. Boyan avoided using fuel in System 001/B, so it has a very low carbon footprint. It uses the ocean currents and wind to move through the water. Ships take away the waste every six to eight weeks.

But how did Boyan do this? He started telling people about his idea on the Internet and asking for help. Eventually, he raised £1.57 million! He also set up a charity called Ocean Cleanup, which now has over 80 engineers, scientists and environmental experts who are all working to change the planet for good.

Boyan shows us that we can make a difference and help protect the planet, no matter how big the problem is. With hard work, fundraising and a good idea, it's never too late to help Planet Earth!

“

Adam: Right. What about switching all the energy to solar or wind power?
Jane: I don't think so because that would be very expensive. How about banning traffic from the city centre?

Jane: I completely agree. Let's prepare our presentation.

A paragraph making suggestions

1 a) Read the paragraph. What is it about?

How to protect the natural environment

by Nat Johnson

Using renewable resources and reducing emissions are the two effective ways to protect our natural environment. **To start with**, we can use renewable resources of energy such as solar, wind or water power instead of burning fossil fuels. **By doing this**, we can reduce the pollution that burning fossil fuels produces and protect our natural resources. Furthermore, **it would be a good idea** to reduce emissions by leaving our cars at home and use public transport. We could also use bikes or walk to work or school. **As a result**, air quality will improve and car emissions will decrease, making our cities healthier and cleaner. **To sum up**, we should use renewable resources of energy and reduce emissions. By doing so, we can help our precious Earth.

b) Answer the questions. Which sentence(s) ...

- 1 state(s) the topic and main points?
- 2 contain(s) the writer's first suggestion and expected result?

Galápagos Islands

with
Tortoise Tours

Travel to one of the most remote destinations on Earth! The Galápagos Islands are 1,000 km west of South America in the Pacific Ocean. They're the perfect place for nature lovers.

The Galápagos Islands are the best place to see incredible animals, including the only species of penguin found north of the equator! There are sea lions, too, and marine iguanas, a type of lizard that swims in the sea. The Galápagos Islands are also home to giant tortoises. These are the largest tortoises on Earth and they live longer than any other reptile on the planet. Some are over 150 years old!

All these animals are endangered species, so eco-tourism is very important in the Galápagos Islands. Visitors need special permission to spend their holiday there. Also, there is a limit to the number of people that can visit the islands. At Tortoise Tours, we can help you with that! We can also plan your holiday from start to finish – we make it as easy as planning a trip in your own country.

Please remember that the Galápagos Islands have a 'leave no trace' policy to protect nature. This means never drop litter, damage the environment or harm animals. After all, you don't visit the Galápagos Islands to change them, but for them to change you!

An email describing a holiday

1 Read the email and answer the questions.

Dear Adrian,

Guess what? I've just got back from an eco-holiday in Cát Bà National Park on Cát Bà, the largest island in the Cát Bà Archipelago, Vietnam.

The national park is an amazing place. You can go trekking, rock climbing or kayaking, but the best thing about it is the wildlife. I spent most of my time exploring the forests, so I saw lots of animals. My favourite ones were the doucs, a type of monkey. They were lovely and very friendly, but sadly, they are endangered. Seeing them made me even more careful about protecting their home, so I stayed on the trails and didn't drop litter.

I had a fantastic time in Cát Bà National Park. You should definitely visit if you get the chance! In the meantime, you can check out my photos on Facebook.

Best wishes,
Sebastian

Ba Bể National Park

Ba Bể National Park is in Bắc Kạn Province in Northeast Vietnam, about 250 km north of the capital city. It became Vietnam's eighth National Park in 1992 and joined the ASEAN Heritage List in 2004. It is rich in animal and plant life.

There are many places to visit in Ba Bể National Park. One of these is Ba Bể lake, which is in the centre. The name Ba Bể means three lakes but it is actually one very large lake in three parts. It is 8 km long and 800 metres wide. The lake is beautiful, and Dấu Dằng waterfall on the Năng River will take your breath away! But the most impressive sight is the Puông Cave. It is over 300 metres long and around 30 metres high. If you sail through the entrance, you can admire the amazing stalactites and stalagmites.

If you visit Ba Bể National Park, don't forget to wear suitable clothes – warm clothes in the winter, T-shirts and shorts in the summer, and good walking shoes. You also need to bring a hat, an insect repellent and sunblock. You can experience homestay accommodation in traditional stilt houses in the nearby villages, meet with the friendly and hospitable locals, and enjoy delicious home-cooked meals!

Reading

- 1 Look at the picture. What do you think would happen if the ice in the Arctic melted?

3.2 Listen and read to find out.

Are we skating on thin ICE?

100 years ago, the Earth was cooler than it is today. In fact, temperatures around the world are 0.8°C higher than they were in 1920. This might not sound like a lot, but it has a terrible effect on the ice in polar regions, as it causes them to melt. The melting of the polar ice caps not only harms the local plants, people and wildlife but it also leads to rising sea levels globally, causing problems for us all.

One of the most serious disasters to hit the polar regions is the breaking of the Ward Hunt Ice Shelf. It is the largest single block of ice in the Arctic. It has been around for 3,000 years and began breaking apart in the year 2000.

As a result, the freshwater from the ice began to flow into the ocean, changing the local environment forever. Without the ice, animals such as polar bears, walruses, and seals must move to new areas and change their feeding habits. Many of these marine mammals are at risk as their home continues to disappear into the ocean.

However, the fast melting of the Arctic ice doesn't only have local effects. As ice caps become smaller and thinner, the Earth takes in more energy from the Sun and the planet becomes warmer. We really need to take notice and wonder: Are we skating on thin ice?

- 2 Read the article again and answer the questions.

- 1 How does the rise in the temperature affect ice caps?
- 2 What happened to the Ward Hunt Ice Shelf?
- 3 Why is this a problem for local ecosystems?
- 4 How do melting ice caps affect the rest of the world?

- ice cap • harm • flow
- at risk • skating on thin ice

Speaking

APPS

of the Future

How many times a day do you tap the icon of your favourite social media site or play a game on your smartphone? When your parents were young, apps didn't even exist, but now we can't imagine our lives without them. So what will apps be like in the future?

A new way to learn

Apps are being used in education. They are useful because students can use them anytime, anywhere and on any device. They present information in bite-sized chunks, which people find easy to understand and remember. Lessons can also be turned into games, making learning fun! Soon, apps will be the new normal.

Augmented Reality (AR)

Inside AR apps, the real world is mixed with the digital one. These apps are downloaded and teachers use them to make learning more interesting. These apps capture students' attention and help them concentrate and interact with their lessons. Students can experience the material and become more interested in the subject. At the same time, they can explore the topic taught at their own pace.

In the future, apps will be able to do a lot of things for us. Some people think this will have a lot of benefits, others think it will make us lazy or that we will forget how to do things for ourselves. Whatever your opinion on modern technology, one thing is certain: the apps of the future will change our lives.

Author's purpose

Authors write texts with a purpose. Identifying the author's purpose helps you understand the text, identify prejudices and come to your own conclusions.

3

- Read the text again and identify the author's purpose. Choose the best answer.

The author's purpose is to ...

- A give us information about how apps are developing.
- B explain predictions about future technology in education.
- C inform us how to use the apps on our phones more efficiently.
- D give us tips on choosing which new apps to download.

Do you know any other similar devices that are used in classrooms in other countries?

The passive

- We use the passive when the doer of the action (the agent) is general (e.g. people), unknown, or is not the topic of speaking.
- We form the passive with the verb **to be** + past participle.

How to change a sentence from active to passive:

- The tense of verb **to be** in the passive sentence is the same as the tense of the main verb in the active sentence.
- We normally use **by** to introduce the agent. We omit the agent when it is a **pronoun, someone/somebody, people, one**, etc.

3.17 Listen and read to check.

PEPPER THE EMOTIONAL ROBOT

Imagine a robot which can tell how you feel just by listening to the sound of your voice and looking at your body language. Meet Pepper, the 'social robot', which can understand human emotions!

Pepper was created by a French company called Aldebaran in 2014. It went on sale in Japan in 2015 and in the USA the following year.

Pepper is a humanoid robot. This means that it looks a bit like a person. It is 1.2 m tall with a head and two arms, and two wheels to move around. Its head has got four microphones and two HD cameras which allow it to navigate and connect with people. Pepper can understand 20 languages and it knows if it's talking to a man, woman or child. It can also understand how a person is feeling by the tone of their voice and their body language. And if you're feeling sad, it tries to make you happy! It can tell you a joke, sing a song and even dance to cheer you up!

Some hospitals use Pepper to greet new patients and walk with them to the correct department. Also, it can cheer up sick children and help them do their physical exercises!

The inventors of Pepper are always creating new software to improve the robot. They also say that Pepper itself has the ability to learn over time! So, who knows what Pepper will think of next to put a smile on our faces!

Do you know any language apps that are used in other countries?

REPORTED SPEECH

We use reported speech to report what someone said.
We use reporting verbs such as **said/said to/told** to report what people said in the past.

said (+ that) + clause

Direct speech: "I don't like the app," Tony said.

Reported speech: Tony said (that) he didn't like the app.

said to/told + object (+ that) + clause

Direct speech: Sophie said to/told me: "They will download the film."

Reported speech: Sophie said to/told me (that) they would download the film.

When we change direct speech to reported speech:

- the tense of the verb normally changes.

Direct speech	Reported speech
Present Simple "I'm OK," he said. "I want to buy a laptop," he said.	Past Simple He said (that) he was OK. He said (that) he wanted to buy a laptop.
Present Continuous "John is working," he said.	Past Continuous He said (that) John was working .
will / won't "I'll print the documents," he said.	would / wouldn't He said (that) he would print the documents.
am / is / are + going to He said, "I'm going to switch it off."	was / were + going to He said (that) he was going to switch it off.
can / can't "We can fix it," he said.	could / couldn't He said (that) we could fix it.

- if the reporting verb is in present tense, future or present perfect, the tense does not change.

Direct speech: Mom says, "She likes educational apps."

Reported speech: Mom says (that) she likes educational apps.

- subject pronouns, object pronouns and possessive adjectives change depending on the speaker and context.

Direct speech: "I'll get a new smartphone," Sam said.

Reported speech: Sam said (that) he would get a new smartphone.

- expressions of time and place often change, but not always, depending on the context.
now → then; today → that day
tomorrow → the next day/the following day
yesterday → the day before/the previous day
next week → the next week/the following week
last month → the month before/the previous month
this/these → that/those; here → there

Direct speech: "I'll get a new smartphone tomorrow," Sam said.

Reported speech:

(One hour later) Sam said (that) he would get a new smartphone **tomorrow**.

(One week later) Sam said (that) he would get a new smartphone **the following day**.

Education in Vietnam Continues Despite COVID-19

On February 3, 2020, most schools in Vietnam had to temporarily close due to the spread of the Coronavirus. In response to the educational emergency caused by the pandemic, immediate action was taken by the Ministry of Education and Training (MOET) to make sure that teaching and learning went on without interruption. Soon after the schools closed, teachers across the country received extra training and support for this sudden change to online teaching and learning. They were also involved in developing special lesson plans in order to meet their students' needs.

Lessons were changed for e-learning through Internet applications such as Zoom, Microsoft Teams and Google Meet. Lessons were also filmed and broadcast on television so that students without computers or Internet access could participate in distance learning. Communication with parents continued on telephone and through online parent-teacher meetings. Learning at all levels went on, examinations took place and the school year finished as planned. On the positive side, Vietnam's responses to Covid-19 in education have created an opportunity to continue with its innovation in technology assisted teaching and learning.

What does DNA stand for?

3.25 Listen and read to find out.

DNA

The BLUEPRINT of Life

DNA is one of the most important things in all living creatures. But what is it exactly? And why is it so important?

DNA, short for deoxyribonucleic acid, is the molecule that contains the genetic code of organisms.

Our DNA contains all the genetic details that make us what we are. Instructions for how our cells grow and work are all inside our DNA. So DNA is a kind of instruction book for how we look.

We have forty-six chromosomes in our bodies, twenty-three from each of our parents, which join together to make pairs. The discovery of chromosomes has been one of the biggest and most important scientific discoveries in human history.

Scientists study DNA for lots of reasons. It can help them understand and treat diseases, genetically modify or improve food, identify people from hair or blood samples, and even create new life through technology like cloning (an identical copy of a plant or animal).

By understanding our DNA and the information inside it, we can understand a lot about ourselves and our health. For example, we can see if we might get certain health problems or illnesses, and we can change our lifestyles to avoid them.

The secrets inside DNA are the key to all life. The more we learn about them, the more we learn about ourselves and the world around us!

The digital revolution has changed the learning process and how education is accessed, used and shared. This has many benefits for all of us.

The main benefit is that e-learning is available to everyone whenever they want it, including at weekends or in the evenings. And that's not all! Unlike in the classroom, with e-learning, you can access the content as many times as you want. This is especially useful when you are preparing for an exam. In traditional learning, if you can't attend a lesson, then you have to prepare on your own. Not to mention that traditional textbooks cannot be updated with new information, as fast as online information is.

What if you are a fast learner? Then, you can work at your own speed instead of following the speed of the whole group. Furthermore, you can choose which parts you want to study and you can skip certain areas you do not want to learn. In addition, e-learning saves you time as you do not need to travel to a school or college.

So, there you have it – e-learning has become popular and important all over the world because it helps students learn better. No one can deny that the future of learning is online!

- 1 You can access e-learning at any time. _____
- 2 E-learning is only for people preparing for exams. _____
- 3 Online information is more up to date than information in books. _____
- 4 Groups of online students all learn at the same speed. _____
- 5 Online students can save the extra hours they normally spend travelling to and from the school. _____

Writing

BUT *They **are enjoying** themselves at the cinema.* (specific preference)

The verbs **look** (when we refer to somebody's appearance) and **feel** (when we experience a particular emotion), can be used in simple or continuous tenses with no difference in meaning.

Present Simple / Present Continuous (future meaning)

- We can use the **present simple** to talk about **timetables** and **programmes**.
The train **leaves** at 10:00.
- We use the **Present Continuous** for **fixed arrangements** in the **near future**.
Jack **is catching** flight BA 394 to London tomorrow morning.

Conditionals – Type 1

- Conditional clauses** consist of two parts: the **if-clause** (hypothesis) and the **main clause** (result). When the **if-clause** comes before the **main clause**, the two sentences are separated by a **comma**. When the **main clause** comes before the **if-clause**, then **no comma** is necessary.
If you don't leave now, you'll miss the bus.
You'll miss the bus if you don't leave now.

Conditional type 1 – Form

if-clause	Main clause
If + present simple	→ will/can/must/ etc. + bare infinitive or imperative

- We use **conditional type 1** to talk about a **real** or **very probable situation in the present** or **future**.
If it **rains**, we **won't** go out.
- We can use **unless** instead of **if ... not** in the **if-clause**. The verb is always in the **affirmative** after **unless**.

Use

We use **conditional type 2** to talk about an **imaginary situation** contrary to facts in the **present**.

If I **had** enough money, I **would buy** a new car.
(I don't have enough money right now.)

We also use **conditional type 2** to **give advice**.
If I **were** you, I **would go** to the police. (advice)

Unit 5

The gerund (-ing form)

Use

We use the **gerund (-ing form)**:

- after certain verbs such as **admit, appreciate, avoid, confess, consider, deny, finish, imagine, mention, mind, miss, practise, risk, suggest**, etc.
Please, **avoid eating** in the room.
- after **love, like, enjoy, hate, dislike** and **prefer**, to express general preference.
Lucy **likes going** out.

DIFFERENCE IN MEANING BETWEEN THE TO-INFINITIVE AND -ING FORM

Some verbs can take either the **to-infinitive** or the **-ing** form with a change in meaning.

- forget + to-inf** = not remember something you need to do
We **forgot to bring** our passports!
- forget + -ing form** = have no memory of something you have done
I'll never **forget going** to Kenya!
- remember + to-infinitive** = not forget to do something
John **remembered to lock** the door.
- remember + -ing form** = have a memory of something you have done
I don't **remember meeting** you before.

- try + to-infinitive** = do one's best, attempt
She **tried to win** the competition.
- try + -ing form** = do something as an experiment
Try **cutting** down on fat; you may lose weight.
- stop + to-infinitive** = stop doing something temporarily in order to do something else
He **stopped to buy** a newspaper on his way home.
- stop + -ing form** = finish doing something
She **stopped going** to the gym when she hurt her back.

Note:

The verbs **begin, start, continue**, etc. can be followed by either a **to-infinitive** or an **-ing form** without any change in meaning.

She **continued writing/to write** the email.

We normally use the infinitive after the continuous forms of the above verbs.

The stadium **is starting to get** crowded. (NOT: The stadium ~~is starting getting~~ crowded.)

The infinitive

There are **two infinitive forms**:

- the **to-infinitive**.
I **want to go** out.
- the **bare infinitive**.
You **can trust** me.

We use the **to-infinitive**:

- after the following verbs: **advise, afford, agree, appear, ask, decide, expect, hope, manage, need, offer, plan, promise, refuse, seem, want**, etc.
We **advise you to remain** calm.
- after **would like, would prefer** and **would love** to express specific preference.
I **would like to eat** some ice cream.

We use the **bare infinitive**:

- after the verbs **let, make, see** and **hear**, etc.
He **made them do** all the exercises.
BUT: They were made to do all the exercises. (passive form)
- after **had better** and **would rather**.
He **would rather walk** to school than take the bus.

Grammar Reference Section

The verbs **see**, **hear** and **watch** are followed by the **bare infinitive** to describe a complete action (something that somebody saw/heard/watched from the beginning to the end). **BUT**: they are followed by an **-ing form** to describe an incomplete action (when we want to say that somebody saw/heard/watched part of the action).
She saw him leave the house. (= She saw the whole action.) **BUT: She saw him leaving the house.** (= She saw part of the action).

Notes:

- **Help** is followed by either the **to-infinitive** or **bare infinitive**.
My mother helped me (to) cook dinner.
- If the two **to-infinitives** are joined by **and** or **or**, the **to** of the second infinitive can be omitted. *He decided to move to New York and get a new job.*
- We form the negative infinitive with **not**.
She promised not to say anything.

Relative pronouns / Relative clauses

The relative pronouns **who**, **which**, **that**, **whose** introduce relative clauses.

The man **who is wearing a grey coat** is Joe's father.

relative clause

- We use **who/that** to refer to people.
- We use **which/that** to refer to objects or animals.
- **Who/which/that** can be omitted when they are the **object of the relative clause**.

That's the girl who helped me at the clean-up day. (subject)

That's the girl who I saw at the clean-up day yesterday. (object)

That's the girl (who) I saw at the clean-up day yesterday. (omission)

- We use **whose** instead of **possessive adjectives** (my, your, his, etc.) with **people**, **objects** and **animals** to show **possession**.

a) *That's the man. His wife is an architect.*

That's the man whose wife is an architect.

b) *That's the car. Its engine was made in Mexico.*

That's the car whose engine was made in Mexico.

- A relative pronoun is **not used** with another **pronoun** (*I, you, me, him, etc.*).
 - a) *I know a doctor who works in this hospital.*
(NOT: ~~I know a doctor who she works in this hospital.~~)
 - b) *The people (who) we met are from Brazil.*
(NOT: ~~The people (who) we met them are from Brazil.~~)

Defining / Non-defining relative clauses

There are two types of relative clauses: **defining relative clauses** and **non-defining relative clauses**.

- A **defining relative clause** gives necessary information and is essential to the meaning of the main sentence. The relative pronouns can be omitted when they are the object of the relative clause.

The jeans are too tight. (Which jeans? We don't know. The meaning of the sentence is not clear.)

The jeans (which/that) I bought yesterday are too tight. (Which jeans? The ones I bought yesterday.)

- A **non-defining relative clause** gives extra information and is not essential to the meaning of the main sentence. In non-defining relative clauses, the relative pronouns cannot be omitted and cannot be replaced by **that**. The relative clause is put between commas.

My dog is very friendly. His name is Blacky. (The meaning of the sentence is clear.)

My dog, whose name is Blacky, is very friendly. (The relative clause gives extra information.)

Unit 6

Comparative / Superlative of adjectives and adverbs

- We use the **comparative** to compare one person or thing with another. We use the **superlative** to compare one person or thing with others of the same group.
Bob is taller than Sam. He's the tallest student in the class.
- We often use **than** after a comparative.
My sister is younger than me.

Grammar Reference Section

- We normally use **the** before a superlative. We can use **in** or **of** after superlatives. We use **in** with places.

He's **the kindest** person **in** the office. He's **the most generous of** all my friends.

Formation of comparatives and superlatives

tall	taller (than)	the tallest (of/in)

Note: *clever, common, cruel, friendly, gentle, narrow, pleasant, polite, quiet, shallow, simple, stupid* form their comparatives and superlatives either with **-er/-est** or with **more/the most**.

friendly – friendlier/**more** friendly – **the friendliest/the most** friendly

Adverbs

- Adverbs that have **the same form** as their adjectives (*hard, fast, free, late, high, early, low, deep, long, near, straight*) take **-er/-est**.
low – lower – **the lowest**

- Two-syllable adverbs and adverbs formed by adding **-ly** to the adjective take **more** in the comparative and **the most** in the superlative form.

often – **more** often – **the most** often

politely – **more** politely – **the most** politely

- For the adverb **early**, drops the **-y** and adds **-ier/-iest**.

- further/farther** (adv) = longer (in distance)

- by** + **means of transport** (**by** car/bus/train).

Compound sentences (*and*, *but*, *or*, *so*)

A compound sentence has two independent clauses that have related ideas. The independent clauses can be joined by using coordinating conjunctions: **and**, **but**, **or**, **so**.

I often make my bed. I often mop the floor.

→ I often make my bed **and** mop the floor.

In the afternoon, John goes cycling. He never goes to the park.

→ In the afternoon, John goes cycling, **but** he never goes to the park.

→ In my free time, I go out with my friends **or** I do sports.

Punctuation

We usually put a comma before **but** and **so**.

I can swim, **but** I can't run fast.

It isn't raining now, **so** let's go for a walk.

Unit 7

The passive

Form

We form **the passive** with the verb **to be** in the appropriate tense and the **past participle of the main verb**.

	ACTIVE	PASSIVE
Present Simple	Sue types the letters.	The letters are typed by Sue.
Present Continuous	Sue is typing the letters.	The letters are being typed by Sue.

Grammar Reference Section

Past Simple	Sue typed the letters.	The letters were typed by Sue.
Past Continuous	Sue was typing the letters.	The letters were being typed by Sue.
Present Perfect	Sue has typed the letters.	The letters have been typed by Sue.
Future Simple	Sue will type the letters.	The letters will be typed by Sue.
Modals (modal+be+pp)	Sue must type the letters.	The letters must be typed by Sue.

Use

We use the **passive**:

- when the doer of the action (the agent) is general (e.g. people), unknown, or is not the topic of speaking.
English **is spoken** everywhere in the world. (The doer of the action is general.)
Our house **was broken into** last night. (We do not know who broke into the house.)
I love this mobile app. It **was developed** by my best friend, Michael. (The topic of speaking is the mobile app, not my best friend.)
- when the **action** itself is **more important** than the person/thing performing the action, as in **news headlines, newspaper articles, formal notices, instructions, ads**, etc.
The village **was completely destroyed** by the earthquake.
- when we want to make statements more **formal** or **polite**.
My favourite mug **has been broken**. (more polite than saying "You have broken my favourite mug.")
- If we want to say who performed the action, we use **by**.
The book **was translated** by James.

Note: The passive is used more often in written English than in spoken English.

Changing from active into passive

To change a sentence from **active** into **passive**:

- the **object** in the active sentence becomes the **subject** in the passive sentence.

- the tense of the verb **to be** in the passive sentence is **the same** as the tense of the main verb in the active sentence.
- the **subject** of the active sentence becomes the **agent**, and is either introduced with the preposition **by** + **person**, **with** + **object/instrument** or it is **omitted**.

	SUBJECT	VERB	OBJECT
ACTIVE	Columbus	discovered	America.
	SUBJECT	VERB	AGENT
PASSIVE	America	was discovered	by Columbus.

Note: Only **transitive verbs** (verbs followed by an object) can be changed into the passive.

Active: Bill **waters the plants**. (transitive verb)

Passive: The plants **are watered** by Bill.

BUT: She **goes to school at eight o'clock**. (The verb *goes* in this sentence is intransitive; that is, it is not followed by an object. The sentence cannot be changed into the passive.)

- We can use the verb **to get** instead of the verb **to be** in everyday speech, when we talk about things that happen by accident or unexpectedly.
Tom's bike **got stolen** yesterday. (= Tom's bike **was stolen** yesterday.)
- We use **by** + **agent** to say who or what carries out the action. We use **with** + **instrument/material/ingredient** to say what the agent uses.
The omelette **was made** by Alex. It **was made** with eggs, butter, tomatoes and cheese.
- The agent is often **omitted** in the passive sentence when the subject of the active sentence is one of the following words: **people, one, someone/somebody, they, he**, etc.

Active: Someone **stole my jacket last night**.

Passive: My jacket **was stolen last night**.

- Object pronouns** (*me, you, him*, etc.) become **subject pronouns** (*I, you, he*, etc.) in the passive.

Active: They **helped me**.

Passive: I **was helped**.

Unit 8

Reported speech

Reported speech is the exact meaning of what someone said, but not the exact words. We do not use quotation marks in reported speech. The word **that** can either be used or omitted after the **reporting verb** (say, tell, etc.).

She said (that) she wouldn't be back until 10 o'clock.

Direct speech is the exact words someone used. We use quotation marks in direct speech.

- When we change direct speech to reported speech, the tense of the verb normally changes:

Personal subject pronouns:

I → he/she; we → they

Personal object pronouns:

- The verb tenses **remain the same** in reported speech when the **reporting verb** is in the **present, future** or **present perfect**.

- The verb tenses can either **change** or **remain the same** in reported speech when reporting **a general truth**.
